EDUCATION

Yonsei University

B.S. in Computer Science, Double Major in Korean Language & Literature

Seoul, South Korea

Mar. 2024 – Present

- Member of **YBIGTA**, Yonsei Big Data & AI Academic Society.
- Member of **Molgorithm**, Yonsei Algorithm Problem Solving Club.

SKILLS SUMMARY

Languages: Python, Java, TypeScript, SQL

Data/Infrastructure: Kafka, Flink, Spark, Docker, DuckDB

Other: React, Electron, Flutter, ROS 2, Hugo

Languages: Korean (Native), English (Working Proficiency)

PROJECTS

dairuri

Mar. 2026 – Present

- Designing a social-impact project addressing rural education accessibility through AI-assisted learning experiences.
- Planning scalable learning experiences and digital service ideas tailored to local educational environments.

compose-coffee

Jan. 2026 – Mar. 2026

- Developed components of an internal analytics dashboard for Compose Coffee as part of a YBIGTA industry-academia collaboration.
- Used React, Electron, and DuckDB to build a unified dashboard over normalized POS and delivery-platform data.
- Automated data normalization workflows across three delivery platforms and POS data, handling roughly 400 million records over a one-year period.

de-winter-project [Link]

Jan. 2026 – Mar. 2026

- Built a reliable, scalable, and fault-tolerant streaming data pipeline simulating Uber ride data using Kafka and Flink.
- Designed real-time ingestion and processing workflows for high-volume event streams.
- Deployed and tested the pipeline in a containerized environment to improve reproducibility and system reliability.

robo-404 [Link]

Sep. 2025 – Mar. 2026

- Developed an AI-powered hazard detection robot system using ROS 2 and YOLO for real-time environmental perception.
- Integrated computer vision and robotic system components to support real-time hazard recognition.

ihei-workstation

Sep. 2024 – Dec. 2024

- Led a team in building Deundeunbap, a Flutter-based mobile platform designed to support meal access for underprivileged children.
- Contributed to service design and mobile app development for a welfare-focused platform.

rc-creative-platform

Mar. 2024 – Dec. 2024

- Developed Hyodobot, a team project building a conversational AI application for elderly users with proactive and voice-based interaction.
- Implemented user-centered features for speech-based interaction, dialogue flow, and personalized communication.
- Designed the service to better support elderly users whose speech patterns are often underrepresented in conventional AI voice services.

HONORS AND AWARDS

- RC House Outstanding Program Award Dec. 2025
- Encouragement Prize, **Upstage LLM Query Hackathon** (Team 22:34) Nov. 2025
- Grand Prize, **RC Portfolio Competition** Jul. 2024

LEADERSHIP AND ACTIVITIES

YBIGTA [\[Link\]](#)

Data Engineering Member, Executive Board

Jun. 2025 – Present

- Yonsei Big Data & AI Academic Society.

Molgorithm [\[Link\]](#)

Executive

Mar. 2025 – Present

- Yonsei Algorithm Problem Solving Club.

ICPC Sinchon [\[Link\]](#)

Staff (Spring 2025), Camp Director (Winter 2026)

Apr. 2025 – Feb. 2026

- Inter-university competitive programming community.

Residential Assistant

Yonsei International Campus, Muak House

Mar. 2025 – Dec. 2025

CS Student Council

Executive

Apr. 2024 – Dec. 2025

- Yonsei University Computer Science Department Student Council.
