EXPERIENCE

AI Education Instructor, Osstem Implant

Mar. 2026 – Present

- Delivering AI training program for a cohort of 12 employees at Osstem Implant.

Freelance Website Maintenance (Next.js)

2025 – Present

- Maintaining and updating a client website built with Next.js on a freelance basis.

PROJECTS

Compose Coffee Analytics Dashboard

Jan. 2026 – Mar. 2026

- Built components of an internal analytics dashboard for Compose Coffee (YBIGTA industry-academia collaboration) using React, Electron, and DuckDB over normalized POS and delivery-platform data.
- Automated data normalization workflows across three delivery platforms and POS data, handling roughly 400 million records over a one-year period.

Real-Time Ride Data Pipeline [Link]

Jan. 2026 – Mar. 2026

- Built a fault-tolerant streaming data pipeline simulating ride data using Kafka and Flink, with real-time ingestion across generator, ingestor, and Flink job services in a containerized environment.
- Used ClickHouse, Nginx, Terraform, Grafana, and Prometheus for infrastructure, observability, and deployment reliability.

ROBO-404: AI Hazard Detection Robot [Link]

Sep. 2025 – Mar. 2026

- Developed an AI-powered hazard detection robot system using ROS 2 and YOLO for real-time environmental perception, integrating computer vision and robotics components for responsive hazard recognition.

HONORS AND AWARDS

- RC House Outstanding Program Award Dec. 2025
- Encouragement Prize, **Upstage LLM Query Hackathon** (Team 22:34) Nov. 2025
- Grand Prize, **RC Portfolio Competition** Jul. 2024
